

MEETING 1: 04/02/26

Topics Covered:

- Initial details of project
- Roles
- Future Work

Initial details of Project:

- Discussed what kind of app we wished to create based on the different options we were given
- We decided on creating a mental health support app for students
 - Briefly discussed what kind of features we could include
- Decided what coding languages could be used

Roles:

- As there were 5 people in the group we decided to have 2 people coding and 3 people managing the documentation
- Set up our Confluence/Jira page to ensure the process followed the Agile practices

Future Work:

- For next meeting everyone should come up with one feature that could potentially be added to the app
- Come up with persona for app

MEETING 2 09/02/26

Topics covered:

- Features
- Personas
- Defining Roles
- Future Work

Features:

- Came up with 5 different features
 - Everyone in the group suggested 1 feature to include in the app. We then decided on which were viable and which to include/alter
- Suggested:
 - Chat support thread
 - Questionnaire
 - FAQ
 - Career Advice
 - Booking
- After discussing the features, we chose to make the Chat support thread our main feature as this met the basic needs of our persona's needs in the app
- Also decided to combine the career advice and booking element

Personas:

- Came up with 5 personas: 3 student personas and 2 counsellor personas
- Began discussing the different user stories and how we could extract features from them

Defining Roles:

Team Roles and Responsibilities

1. Product Owner - Himari • Define personas and product vision • Write and refine user stories • Manage and prioritise the product backlog • Design user flows and basic UI structure
2. Scrum Master / Documentation - Phoebe • Facilitate sprint planning and team meetings • Maintain meeting logs and sprint summaries • Ensure Agile practices are followed • Organise and maintain the Agile portfolio document
3. Backend Developer / System Design - Sandy • Design the data model and APIs • Implement backend logic • Create and maintain UML diagrams (e.g., class diagram)
4. Frontend Developer / UIUX - Nina • Implement the user interface • Integrate frontend with backend APIs • Improve usability and interaction
5. QA / Testing - Zi • Define and execute test cases • Verify acceptance criteria • Collect test evidence (screenshots, logs, results) • Map user stories to evidence for submission

Future Work:

- Complete personas and user stories
- Begin frontend and backend development
- Fill in Agile Product Portfolio for the meetings, personas, and user stories so far

MEETING 3 16/02/26

Topics Covered:

- Personas and User Stories
- Admin/Organisation
- MVP
- Development
- Future Work

Personas and User Stories:

- Completed and refined all the personas and user stories
- Linked the user stories to our different features, providing explanations on how our features are derived from the stories
- Edited the personas and user stories to ensure there was no overlap

Admin/Organisation:

- Set up Jira to manage our workflow
- Explained how to use Jira and add different tasks and mark them as completed

Development:

- Began frontend development
 - Demonstrated the initial UI pages planned for mobile version
 - Cut one of the pages out as it was redundant
- Created script for the database
- Began backend schema

Future Work:

- Fill in document - Meeting logs, persona, and user stories
- Clearly define features for the support thread
- Design UI for desktop view
- Make API to show list of thread and messages for each thread
 - Make API to post data for request and to post a message

MEETING 4 02/03/26

Topics Covered:

- Features for Sprint 2
- Changes to current features
- Future Work

Features for Sprint 2:

- Starting Sprint 2 so need to add next features we planned at the start
- Need to add a booking feature where student personas can book counselling and wellbeing activities
 - For booking feature need to make sure that counsellor is able to cancel bookings
 - Discuss wellbeing booking activity with TA on how students and counsellors should interact with booking
- Need to add FAQ and Urgency feature

Changes to current features:

- Currently all counsellors can see all threads and bookings
 - Should change it so that counsellors can only see their own threads/ conversations
 - Privacy

Future work:

- Make changes to who can see the current threads (only the counsellor and student in the conversation)

MEETING 5 09/03/26

Topics Covered:

- App Development
- New/Existing Features
- Future Work

App Development:

- Discussed the front end development of the new features
 - UI/UX
- Completed the sequence and class diagrams for backend - showing and explaining to the group

New/Existing Features:

- Discussed the current features and how they can be changed/edited to fit the personas and user stories better
- The admins/counsellors all had different logins but everyone could see the Support Thread chats
 - Contemplated having one admin account that all counsellors could log in to but ultimately chose to keep it separate so that students knew which counsellor they were talking to
 - Students can remain anonymous in chats still
- Had a full questionnaire for the urgency feature but cut down to <10 questions in the case a student was in immediate need of help

Future Work:

- Complete Booking and Urgency feature

MEETING 6 16/03/26

Topics Covered:

- Current progress with app
- Features
- Submission
- Future Work

Current progress with app:

- Completed the booking feature
 - Students are able to book different types of activity e.g wellbeing workshop, counsellor meeting
 - Students also able to see past/present/upcoming bookings and can cancel
 - Counsellors are able to see all activities but only edit/manage if host of event matches current user
 - Counsellors can also create new workshops
- Completed calendar view of meetings/activities
 - Counsellors need to be able to cancel one-on-one bookings

Features:

- Questionnaire next feature to be added, then FAQ
- Questionnaire should have 3 levels of urgency
- FAQ should have a search feature, counsellors should be able to create new thread, and students can open a support thread if they can't find a FAQ page

Submission:

- Discussed recording the video demonstrating all the features for submission
 - Who would do it and whether we would use a voice over or subtitles
- Need to complete document for submission and fill in tables
- Likely to record video over easter break

Future Work:

- Complete FAQ and Urgency Questionnaire
- Complete video recording and document for submission
- Testing Criteria for app
